The Association for the Advancement of Assistive Technology in Europe (AAATE) in conjunction with the Centre for Assistive Technology and Connected Healthcare (CATCH) at the University of Sheffield is delighted to announce the 14th AAATE conference.

The 2017 AAATE conference will take place in Sheffield from 13–15 September 2017, with satellite events and a public exhibition.

The 2017 conference will address the global challenge of our aging society in order to meet the needs of the increasing number of people who could benefit from Assistive Technology – after asking the question:

How can we design and implement accessible, affordable assistive technology and associated services to achieve independence?

The conference will have a very broad and open assistive technology breadth but will also focus on the translational research agenda. So the programme invites contributions around: the WHO GATE initiative; Society, Policies and Assistive Technology; and Service Implementations.

We invite researchers, business and organisations wishing to focus on another specific topic to contact us about proposing special sessions or a satellite event before 01/06/16.

The event will offer opportunities to about 400 delegates to share and network. To register your interest in receiving updates, attending the conference, joining with your satellite-event or exhibiting in Sheffield please contact us via our website: **www.aaate2017.eu**
