InLife 1st International Workshop
Medetel, Luxembourg April 7th 2016

INdependent **LI**ving support **F**unctions for the **E**lderly

www.inlife-project.eu

How can comprehensive support for independent living and mobility of older people with cognitive impairments be achieved across Europe? What are their and their families/ carers primary needs, concerns and expectations from digital technologies and services? The InLife response to these questions and much more will be presented and discussed at the 1st InLife international Workshop.

Register to attend the free workshop organized by InLife.

To participate see the form on the next page and save the date.

The H2020 European project InLife invites you to join us. All stakeholders are welcome. InLife aims are to prolong and support the independent living of seniors with cognitive impairments, through interoperable, open, personalised and seamless ICT solutions that support home activities, communication, health maintenance, travel, mobility and socialisation tasks, with novel, scalable and viable business models, based on user/stakeholder identified needs and feedback from large-scale and multi-country service implementations.

The InLife 1st International Workshop will serve as a forum to present current and future work as well as to exchange ideas in the field of independent living and autonomous mobility of the older people with cognitive impairments.

How to participate

Participation in the InLife workshop is **free**, but because it is hosted within the Med-e-tel conference* pre-registration is required. The workshop language is English.

To register, please send an email by March 8th 2016 with the following details to shef.cudd@outlook.com

IN LIFE first workshop, 14.00-18.00 April 7th 2016, Luxembourg*
